A licensed Amateur Radio Operator, whose address is shown above, handled this message free of charge. As such messages are handled solely for the pleasure of operating, a "Ham" Operator can accept no compensation. A return message may be filed with the "Ham" delivering this message to you. Further information on Amateur Radio may be obtained from ARRL Headquarters, 225, Main Street, Newington, CT 06111.

The American Radio Relay League, Inc. is the National Membership Society of licensed radio amateurs and the publisher of *QST* Magazine. One of its functions is promotion of public service communication among Amateur Operators. To that end, The League has organized the National Traffic System for daily nationwide message handling.

Click on any section of this Message Form for information on how to use it.

GENERAL

Follows a description of the different parts of the Amateur Radio Message format. Some sections are OPTIONAL, and I recommend they not be used, unless needed. The use of this pre-printed message form from ARRL is NOT necessary for handling traffic. Use any paper you seem appropriate.

MESSAGE NUMBER (Mandatory)

This can be any number the originating station chooses. Most start with 1 the first of each year. Once a message is numbered, that same number remains with the message until delivered. Example: NR 1

PRECEDENCE (Mandatory)

The Precedence of the Message determines what order the messages will be handled. Most of the time all messages are handled on every net session. The following four precedences are used in ascending order of priority:

ROUTINE (R on CW)

99.99% of all messages have this precedence. These messages will be handled last.

WELFARE (W on CW)

This message is either an inquiry to the health and welfare of an individual in a disaster area or a report of the health and welfare of an individual. These messages will be handled before ROUTINE traffic.

PRIORITY (P on CW)

These are messages have specific time limits. They are also for Official messages, not covered in the EMERGENCY category. This traffic will be handled before WELFARE or ROUTINE.

EMERGENCY (EMERGENCY on CW)

Any message having life and death urgency to any person or group of persons, which is transmitted by Amateur Radio in the absence of regular communication facilities. When in doubt, do NOT use this precedence. This traffic will be handle first and immediately.

Example: NR 1 R (for Routine)

[Return to Top](#)

HANDLING INSTRUCTIONS (Optional)

Handling Instructions are sometimes used to tell the various stations along the way, what the desires of the originating station are. If not needed, it is best not to use. On phone: the sending station would say, 'HANDLING INSTRUCTIONS n', n explained below. On CW: Send HXn.

HXA (Followed by a number)

Collect landline delivery authorized by the by addressee within ... miles. (If no number, authorization is unlimited).

HXB (Followed by a number)

Cancel message if not delivered within ... hours of filing time; service originating station.

HXC

Report the time and date of delivery to originating station.

HXD

Report to the originating station the identity of the station from which you received, plus time and date. Report the identity of the station to which it was relayed, plus time and date, or if delivered report time and date of delivery.

HXE

Delivering station get a reply from the addressee, and originate a message back.

HXF (Followed by number)
Hold delivery until ... (date).

HXG
Delivery by mail or landline toll call not required. If toll or other expense involved, cancel message and service originating station.

Example: NR I R HxG

Return to Top

STATION OF ORIGIN (Mandatory)

This is the call sign of the Amateur Radio Station generating (originating) this message. This call sign, along with the message number, serve as the "serial number" of this message. Any future reference to this message would be: "Number nn of CALL nn4nnn" .

Example: NR I R K4IWW

Return to Top

CHECK (Mandatory)

This is a count of the number of words used in the TEXT (only) of the message. Words in the address or signature are NOT counted. Groups of figures, letters, combinations of figures and letters, and "X" are counted as words. This is the method that Amateurs use to make sure that the TEXT was received without error. Both the sender and receiver should end up with the same word count (CHECK).

Example; NR 1 R K4IWW 12

Return to Top

PLACE OF ORIGIN (Mandatory)

This field is the City and State of either the Station of Origin or the person in the Signature. In most cases, this will be the same place.

Example: NR 1 R K4IWW 12 CARY NC

Return to Top

TIME FILED (Optional)

The time the message was originated. You may either use UTC or Local time. Examples: 1675Z or 1715 EST. Most messages do NOT use this field. It is only useful if the message has a short time value.

Example: NR 1 R K4IWW 12 CARY NC 1615Z

Return to Top

DATE (Mandatory)

This is the date the message was originated. In Amateur Radio, we use month and day. The year is NOT used. If the message is over a year old, it should be sent to the circular file.

Example: NR 1 R K4IWW 12 CARY NC I615Z DEC 20

[Return to Top](#)

ADDRESSEE (Mandatory)

The name(s) and address of the person to whom this message is going. It looks like the address on an envelope used in snail mail. Include a phone number, if you have it. The more information here, the easier the delivery will be.

Example:

JOHN Q PUBLIC
1234 MAPLE AVE
ANYTOWN SC 29000

843 555 1234

[Return to Top](#)

DELIVERING STATION INFO (Optional)

This section is rarely used. If the message is to be mailed or hand delivered, it is nice to put your (the delivering station) info here so the addressee can reach you if there is any question, or they want to send a return message. Most messages are delivered by phone.

[Return to Top](#)

TEXT (Mandatory)

Finally! This is the message you are sending for the signature person to the addressee. It should be short (usually less than 25 words) and in telegram style. No punctuation is used. The letter "X" is used (similar to STOP in telegrams) to end one idea and start another. Many messages do not even have an "X" in them.

Example TEXT:

ARRIVE 7PM DEC 24 X
LOOKING FORWARD TO SEEING YOU
X LOVE

The above TEXT has a count of 12. So the CHECK is 12. As Amateur Radio is non-commercial, the TEXT should have no commercial value. Each Radio Amateur is the judge of what is commercial and what is not.

[Return to Top](#)

SIGNATURE (Mandatory)

This is the name of the person sending the message. It may be the name or call of the originating station. However, it is usually the name of a "third party", for whom the originating station is generating the message.

[Return to Top](#)

RECEIVED (Optional)

This is for the handling station to write down who they received the message from. This field is only for the book keeping of the handling station.

[Return to Top](#)

SENT (Optional)

This is for the handling station to write down to whom they sent the message to. This field is only for the book keeping of the handling station.
