

Radio Relay International Numbered Radiogram Texts

For use on all RRI/NTS traffic nets. Final-approved version 2.0 Release date October 1, 2022

Instructions:

1. Place "RRC" ahead of the check (group count). The check is the number of groups in text as originated, NOT as translated.
2. Spell out the text number. For example "RRC NINE." Spelling the number will prevent serious errors in translation.
3. Fill in the blanks in the order they appear in the numbered radiogram text.
4. Numbered radiogram texts are designed to preserve circuit capacity by minimizing transmit and formatting time, particularly when using "book traffic" techniques or when circuit capacity is limited.
5. When delivering a radiogram, translate the text and transcribe in all capitals as additional content may be relayed using non-case-sensitive modes.

Color Codes:

No color code: Routine message texts

Light green: Welfare messages corresponding to older ARL Numbered Radiogram Texts.

Light blue: Network management and possible emergency communications use.

Gold: Special "safe and well" texts approved by ARC. These correspond to the RRI-Winlink Radiogram Templates available on RMS software

Texts in italics correspond to older ARL Numbered Radiogram Texts

New texts inserted within old ARL Numbered Radiogram grouping indented slightly.

1	<i>ONE</i>	Everyone safe here. Please don't worry.
